

# Red Hat (3scale) Recognized as a Leader in the Magic Quadrant for Full Life Cycle API Management

MAY 04, 2018

*Evaluation based on completeness of vision and ability to execute*

RALEIGH, N.C.--(BUSINESS WIRE)-- Red Hat, Inc. (NYSE:RHT), the world's leading provider of open source solutions, today announced Red Hat (3scale) has been named a Leader by Gartner in its April 2018 Magic Quadrant for Full Life Cycle API Management. [Red Hat \(3scale\)](#) was also placed in the Leaders quadrant of the previous version of the Magic Quadrant for Full Life Cycle API Management.

Gartner's Magic Quadrants are based on analysis of a vendor's completeness of vision and ability to execute. According to Gartner, "It is impossible to provide the platform for any digital strategy, build ecosystems and run an effective API program, without full life cycle API management."

3scale API Management is an [award-winning](#) platform designed to provide end-to-end application programming interface (API) management capabilities on premise or across public, private or hybrid cloud environments. Red Hat 3scale API Management includes features for security management, access control, rate limits, monetization, and rich developer experience tools, as well as robust API performance analytics and reporting capabilities. API management delivers one of the core elements of an agile integration methodology, alongside distributed integration and containerization, which together represent an innovative and powerful approach to more quickly and easily integrate new applications and services with business data and legacy applications.

## Supporting Quote

*Steven Willmott, senior director and head of API Infrastructure, Red Hat*

"The ubiquity of APIs today not only speaks to the power of the technology to unlock critical information spread throughout disparate systems and data, but also their role in shifting the way organizations conduct business in the digital era. We feel that effective API management is necessary for gaining visibility, control, flexibility and scalability over the API environment, and we are proud to have been named a Leader by Gartner in back-to-back Magic Quadrants for Full Life Cycle API Management."

## Forward-Looking Statements

Certain statements contained in this press release may constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements provide current expectations of future events based on certain assumptions and include any statement that does not directly relate to any historical or current fact. Actual results may differ materially from those indicated by such forward-looking statements as a result of various important factors, including: risks related to the ability of the Company to compete effectively; the ability to deliver and stimulate demand for new products and technological innovations on a

timely basis; delays or reductions in information technology spending; the integration of acquisitions and the ability to market successfully acquired technologies and products; risks related to errors or defects in our offerings and third-party products upon which our offerings depend; risks related to the security of our offerings and other data security vulnerabilities; fluctuations in exchange rates; the effects of industry consolidation; uncertainty and adverse results in litigation and related settlements; the inability to adequately protect Company intellectual property and the potential for infringement or breach of license claims of or relating to third party intellectual property; changes in and a dependence on key personnel; the ability to meet financial and operational challenges encountered in our international operations; and ineffective management of, and control over, the Company's growth and international operations, as well as other factors contained in our most recent Annual Report on Form 10-K (copies of which may be accessed through the Securities and Exchange Commission's website at <http://www.sec.gov>), including those found therein under the captions "Risk Factors" and "Management's Discussion and Analysis of Financial Condition and Results of Operations". In addition to these factors, actual future performance, outcomes, and results may differ materially because of more general factors including (without limitation) general industry and market conditions and growth rates, economic and political conditions, governmental and public policy changes and the impact of natural disasters such as earthquakes and floods. The forward-looking statements included in this press release represent the Company's views as of the date of this press release and these views could change. However, while the Company may elect to update these forward-looking statements at some point in the future, the Company specifically disclaims any obligation to do so. These forward-looking statements should not be relied upon as representing the Company's views as of any date subsequent to the date of this press release.
