

# Flytoget Deploys Red Hat JBoss Fuse and the 3scale API Management Technology to Further Its Digital Ambitions

SEP 07, 2016

*Flytoget opens new possibilities for integration and generating new business opportunities with IT infrastructure overhaul*

RALEIGH, N.C.--(BUSINESS WIRE)-- Red Hat, Inc. (NYSE: RHT), the world's leading provider of open source solutions, today announced that Norwegian airport express train operator Flytoget has deployed Red Hat's lightweight, flexible integration platform, JBoss Fuse, and API management technology developed by 3scale, acquired by Red Hat in June 2016, as part of an initiative to digitise and automate the company's key value chain.

Flytoget, which operates the airport express between Oslo Airport and the city center, is modernizing its IT infrastructure to help develop its competitive advantage in order to increase the attractiveness of public transport. As part of this modernization effort, the company is moving from on-premise servers to a cloud-based approach, and adopting DevOps practices to help the company's IT team offer its customers new features and services.

Digitizing and automating the value network across business lines and beyond traditional enterprise boundaries is an important objective for Flytoget toward the realization of its business vision and strategy for the future.

By establishing a modern and elastic integration infrastructure using JBoss Fuse and API management technology developed by 3scale, Flytoget is able to build smarter services designed to help the company remain competitive. The platform can be used to integrate with partners, both internal and external, and to establish a network of partners empowering smarter, more integrated, consumer-facing transportation services. The integration infrastructure is also expected to help the company develop internal services offerings, as well as serve Flytoget's own mobile solutions.

This project is in line with Flytoget's goal to use standard solutions as often as possible, in an ongoing effort for digital transformation, enabling a more agile enterprise, infrastructure to move to the cloud, and an IT department focused on DevOps.

The integration infrastructure based on JBoss Fuse and the API management technology from 3scale was implemented and supplied by Greenbird Integration Technology AS.

#### Supporting Quotes

*Jimmy Sköldberg, regional manager, Nordics, Red Hat*

"We're happy to play an important role in Flytoget's modernization initiative. Flytoget is a great example of how traditional businesses can create new business opportunities through the modernization of processes infrastructure."

*Bjørn Hole, head of innovation and IT architecture, Flytoget*

"The platform based on Red Hat JBoss Fuse and the API management technology from 3scale gives us the ability to address collaboration opportunities through a proxy, which enables us to set the very specific and sometimes narrow rules for API access that we require. It also helps us scale back-end operations easily for when we need to meet peaks in demand. We are focused on what we want to achieve, so we do not spend unnecessary time on doing things that are not value-driven. Every project we initiate should create business value."

#### About Red Hat, Inc.

Red Hat is the world's leading provider of open source software solutions, using a community-powered approach to provide reliable and high-performing cloud, Linux, middleware, storage and virtualization technologies. Red Hat also offers award-winning support, training,

and consulting services. As a connective hub in a global network of enterprises, partners, and open source communities, Red Hat helps create relevant, innovative technologies that liberate resources for growth and prepare customers for the future of IT. Learn more at <http://www.redhat.com>.

#### Forward-Looking Statements

Certain statements contained in this press release may constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements provide current expectations of future events based on certain assumptions and include any statement that does not directly relate to any historical or current fact. Actual results may differ materially from those indicated by such forward-looking statements as a result of various important factors, including: risks related to the ability of the Company to compete effectively; the ability to deliver and stimulate demand for new products and technological innovations on a timely basis; delays or reductions in information technology spending; the integration of acquisitions and the ability to market successfully acquired technologies and products; fluctuations in exchange rates; the effects of industry consolidation; uncertainty and adverse results in litigation and related settlements; the inability to adequately protect Company intellectual property and the potential for infringement or breach of license claims of or relating to third party intellectual property; risks related to data and information security vulnerabilities; the ability to meet financial and operational challenges encountered in our international operations; ineffective management of, and control over, the Company's growth and international operations; and changes in and a dependence on key personnel, as well as other factors contained in our most recent Quarterly Report on Form 10-Q (copies of which may be accessed through the Securities and Exchange Commission's website at <http://www.sec.gov>), including those found therein under the captions "Risk Factors" and "Management's Discussion and Analysis of Financial Condition and Results of Operations". In addition to these factors, actual future performance, outcomes, and results may differ materially because of more general factors including (without limitation) general industry and market conditions and growth rates, economic and political conditions, governmental and public policy changes and the impact of natural disasters such as earthquakes and floods. The forward-looking statements included in this press release represent the Company's views as of the date of this press release and these views could change. However, while the Company may elect to update these forward-looking statements at some point in the future, the Company specifically disclaims any obligation to do so. These forward-looking statements should not be relied upon as representing the Company's views as of any date subsequent to the date of this press release.
