

# Red Hat Software Collections 1.1 Now Generally Available

JUN 04, 2014

*Second installment of Red Hat Software Collections delivers comprehensive suite of dynamic languages, open source databases and web development tools*

RALEIGH, N.C.--(BUSINESS WIRE)-- Red Hat, Inc. (NYSE: RHT), the world's leading provider of open source solutions, today announced the general availability of Red Hat Software Collections 1.1, the second iteration of Red Hat's comprehensive suite of powerful web development tools, dynamic languages and open source databases. Delivered on a separate life cycle from Red Hat Enterprise Linux with a more frequent release cadence, Red Hat Software Collections puts the latest stable open source runtime components, as tested and verified by Red Hat on Red Hat Enterprise Linux, in the hands of developers faster, accelerating the creation and deployment of modern web applications.

Red Hat Software Collections 1.1 bridges developer agility and production stability by providing a compelling solution to organizations seeking to leverage agile methods as a means of boosting the pace of software delivery. Enterprises can deploy applications built with Red Hat Software Collections 1.1 with confidence, as each release of Red Hat Software Collections is backed by Red Hat's award-winning support for three years.

Red Hat Software Collections 1.1 includes:

The latest stable versions of popular dynamic languages and platforms, including:

Ruby 1.9.3 with Rails 3.2.8

Python 2.7 and 3.3

PHP 5.4 and 5.5

Perl 5.16.3

Node.js 0.10 as a Technology Preview

Ruby 2.0 and Rails 4.0, featured as individual collections, enabling developers to install an updated version of Ruby without necessarily having to install Rails.

The latest stable versions of open source databases, including:

MySQL 5.5 and PostgreSQL 9.2, popular open source databases for web applications

MariaDB 5.5, an easy-to-adopt alternative to MySQL

MongoDB 2.4, a high performance document database that provides high availability and easy scalability.

Two open source HTTP server options, with full support for Apache HTTP Server 2.4 and a Technology Preview of Nginx 1.4.4.

Thermostat 1.0, a useful tool for monitoring JVM instances on multiple hosts.

Organizations seeking to leverage the open hybrid cloud also benefit from Red Hat Software Collections 1.1, as applications built using Red Hat Software Collections can be deployed across multiple versions of Red Hat Enterprise Linux and OpenShift by Red Hat, providing flexibility across physical, virtual and cloud environments.

Customers with active Red Hat Enterprise Linux 6 subscriptions who do not see Red Hat Software Collections channels can visit:

Supporting Quotes

*Jim Totton, vice president, Platform Business Unit, Red Hat*

"Red Hat Software Collections is more than just access to the latest and greatest open source languages and databases - it helps to effectively link development and operations teams. By bridging developer agility and production stability, organizations leveraging Red Hat Software Collections can gain increased application nimbleness and achieve faster development and deployment cycles without risking mission-critical systems and applications on untried, untested and unsupported technologies."

## Forward-Looking Statements

Certain statements contained in this press release may constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements provide current expectations of future events based on certain assumptions and include any statement that does not directly relate to any historical or current fact. Actual results may differ materially from those indicated by such forward-looking statements as a result of various important factors, including: risks related to delays or reductions in information technology spending; the effects of industry consolidation; the ability of the Company to compete effectively; the integration of acquisitions and the ability to market successfully acquired technologies and products; uncertainty and adverse results in litigation and related settlements; the inability to adequately protect Company intellectual property and the potential for infringement or breach of license claims of or relating to third party intellectual property; the ability to deliver and stimulate demand for new products and technological innovations on a timely basis; risks related to data and information security vulnerabilities; ineffective management of, and control over, the Company's growth and international operations; fluctuations in exchange rates; and changes in and a dependence on key personnel, as well as other factors contained in our most recent Annual Report on Form 10-K (copies of which may be accessed through the Securities and Exchange Commission's website at <http://www.sec.gov>), including those found therein under the captions "Risk Factors" and "Management's Discussion and Analysis of Financial Condition and Results of Operations". In addition to these factors, actual future performance, outcomes, and results may differ materially because of more general factors including (without limitation) general industry and market conditions and growth rates, economic and political conditions, governmental and public policy changes and the impact of natural disasters such as earthquakes and floods. The forward-looking statements included in this press release represent the Company's views as of the date of this press release and these views could change. However, while the Company may elect to update these forward-looking statements at some point in the future, the Company specifically disclaims any obligation to do so. These forward-looking statements should not be relied upon as representing the Company's views as of any date subsequent to the date of this press release.
