

# MEDIA ALERT: Red Hat to Host Virtual Event, "Building Data-Driven Solutions for the Internet of Things," on April 23, 2015

APR 16, 2015

RALEIGH, N.C.--(BUSINESS WIRE)-- Red Hat, Inc. (NYSE: RHT), the world's leading provider of open source solutions, today announced that the company will host "[Building data-driven solutions for the Internet of Things](#)," a webcast and virtual event, at 11 a.m. EDT on Thursday, April 23, 2015. As people, devices, and machines increasingly connect to form a broader and broader networks of "things," all sending and receiving data to one another, being able to understand and leverage the Internet of Things (IoT) within the enterprise becomes an important task.

This Red Hat virtual event aims to help explain and explore the opportunities posed by IoT to the enterprise world, and attendees will learn how to:

- Collect, secure, and scale the data flowing through the IoT
- Analyze and enable a continuous flow of data throughout the information lifecycle
- Act on real-world IoT insights from Red Hat partners and customers

Featuring Red Hat experts, strategic partners, and industry analysts, "Building data-driven solutions for the Internet of Things" will highlight infrastructure optimization for IoT and how best to start - or continue - an IoT journey.

## Forward-Looking Statements

Certain statements contained in this press release may constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements provide current expectations of future events based on certain assumptions and include any statement that does not directly relate to any historical or current fact. Actual results may differ materially from those indicated by such forward-looking statements as a result of various important factors, including: risks related to delays or reductions in information technology spending; the effects of industry consolidation; the ability of the Company to compete effectively; the integration of acquisitions and the ability to market successfully acquired technologies and products; uncertainty and adverse results in litigation and related settlements; the inability to adequately protect Company intellectual property and the potential for infringement or breach of license claims of or relating to third party intellectual property; the ability to deliver and stimulate demand for new products and technological innovations on a timely basis; risks related to data and information security vulnerabilities; ineffective management of, and control over, the Company's growth and international operations; fluctuations in exchange rates; and changes in and a dependence on key personnel, as well as other factors contained in our most recent Quarterly Report on Form 10-Q (copies of which may be accessed through the Securities and Exchange Commission's website at <http://www.sec.gov>), including those found therein under the captions "Risk Factors" and "Management's Discussion and Analysis of Financial Condition and Results of Operations". In addition to these factors, actual future performance, outcomes, and results may differ materially because of more general factors including (without limitation) general industry and market conditions and growth rates, economic and political conditions, governmental and public policy

changes and the impact of natural disasters such as earthquakes and floods. The forward-looking statements included in this press release represent the Company's views as of the date of this press release and these views could change. However, while the Company may elect to update these forward-looking statements at some point in the future, the Company specifically disclaims any obligation to do so. These forward-looking statements should not be relied upon as representing the Company's views as of any date subsequent to the date of this press release.
