

# Red Hat Adds QuickStart Cloud Installer to Red Hat Cloud Suite to Help Speed Private Cloud Deployments

SEP 14, 2016

*New installer enables users to deploy integrated cloud services with application development platforms in hours*

RALEIGH, N.C.--(BUSINESS WIRE)-- Red Hat, Inc. (NYSE: RHT), the world's leading provider of open source solutions, today introduced QuickStart Cloud Installer as part of Red Hat Cloud Suite, its pre-integrated set of cloud technologies. With the web-based, graphical QuickStart Cloud Installer, users can orchestrate the installation of Red Hat Cloud Suite components from a single interface. As a result, users can access a fully functional private cloud environment with pre-defined default configurations within mere hours as shown by Red Hat testing.

Red Hat Cloud Suite offers an integrated hybrid cloud solution with a container application platform, massively scalable infrastructure and unified management tools, all available individually or via a single solution. This combination of technologies provides a modern cloud environment where application delivery teams can focus on development, testing, and deployments using modern cloud and container-based solutions, while maintaining control and visibility.

QuickStart Cloud Installer is designed to cut time spent on installation and post configuration (to less than four hours in most deployment scenarios) and require only minimal documentation proficiency from users, helping to further simplify the workflow for deploying fully integrated cloud services and application development platforms. It launches with key capabilities, including:

A single, web-based intuitive interface enables users to provision a fully functional cloud solution using any combination of the Red Hat Cloud Suite components, including:

Red Hat CloudForms 4.1;

Red Hat OpenShift Container Platform 3.2 (OpenShift Enterprise 3.2);

Red Hat OpenStack Platform 8;

Red Hat Satellite 6.2; and

Red Hat Virtualization 4.

Automatically registers deployed products with the Red Hat Satellite server for rolling product updates.

Integrates with Red Hat Storage (Ceph or Gluster), using the software-defined storage configurations for Red Hat Virtualization, Red Hat OpenStack Platform or OpenShift Container Platform deployments.

Performs verification and validation of configuration including auto-generating a list of minimum system requirements required for the deployment.

Integrates with the Red Hat Customer Portal for automated subscription management.

## Availability

The QuickStart Cloud Installer is [currently available](#) for customers with entitlements to Red Hat Cloud Suite or Red Hat Cloud Infrastructure.

## Supporting Quote

*Lars Herrmann, general manager, Integrated Solutions Business Unit, Red Hat*

“With cloud solutions, customers are seeking scalability and speed to build flexible cloud applications while retaining control. Red Hat Cloud Suite offers an integrated open source solution to help users modernize their infrastructures to more quickly build and deliver cloud services and develop cloud-native applications using unified management tools and workflows. I’m excited about QuickStart Cloud Installer being added to Red Hat Cloud Suite today and how it can help our customers to simplify and speed up their cloud initiatives.”

#### Forward-Looking Statements

Certain statements contained in this press release may constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements provide current expectations of future events based on certain assumptions and include any statement that does not directly relate to any historical or current fact. Actual results may differ materially from those indicated by such forward-looking statements as a result of various important factors, including: risks related to the ability of the Company to compete effectively; the ability to deliver and stimulate demand for new products and technological innovations on a timely basis; delays or reductions in information technology spending; the integration of acquisitions and the ability to market successfully acquired technologies and products; fluctuations in exchange rates; the effects of industry consolidation; uncertainty and adverse results in litigation and related settlements; the inability to adequately protect Company intellectual property and the potential for infringement or breach of license claims of or relating to third party intellectual property; risks related to data and information security vulnerabilities; the ability to meet financial and operational challenges encountered in our international operations; ineffective management of, and control over, the Company's growth and international operations; and changes in and a dependence on key personnel, as well as other factors contained in our most recent Quarterly Report on Form 10-Q (copies of which may be accessed through the Securities and Exchange Commission's website at <http://www.sec.gov>), including those found therein under the captions "Risk Factors" and "Management's Discussion and Analysis of Financial Condition and Results of Operations". In addition to these factors, actual future performance, outcomes, and results may differ materially because of more general factors including (without limitation) general industry and market conditions and growth rates, economic and political conditions, governmental and public policy changes and the impact of natural disasters such as earthquakes and floods. The forward-looking statements included in this press release represent the Company's views as of the date of this press release and these views could change. However, while the Company may elect to update these forward-looking statements at some point in the future, the Company specifically disclaims any obligation to do so. These forward-looking statements should not be relied upon as representing the Company's views as of any date subsequent to the date of this press release.
