

Red Hat Announces New Training Course for Red Hat Enterprise Linux OpenStack Platform

APR 09, 2014

New course Helps IT Professionals Enhance their OpenStack Skills Through Online and Traditional Learning

RALEIGH, N.C.--(BUSINESS WIRE)-- Red Hat, Inc. (NYSE: RHT), the world's leading provider of open source solutions, today announced the immediate availability of a new OpenStack training course, Neutron Networking with Red Hat Enterprise Linux OpenStack Platform.

The new course uses a hands-on lab atmosphere to provide IT professionals with the skill-sets they need to implement and maintain OpenStack deployments. Aimed at helping enterprises build their teams' readiness to adopt and use Red Hat Enterprise Linux OpenStack Platform, the course takes an in depth look at the technology and how organizations can fully reap the benefits. The [OpenStack Networking \(Neutron\) training](#) course is available via traditional and virtual classrooms and on-site private team training. In the coming weeks, the new course will be available via self-paced online learning for added flexibility and convenience.

Now in their 15th year, Red Hat Training courses benefit both students and the companies they work for by delivering some of the most comprehensive curricula regarding open source technology. Trainings and certifications are oriented around real-world job roles and tasks, providing enterprises with assurance that their IT departments are getting the most out of their Red Hat environments.

The new course, [Neutron Networking with Red Hat Enterprise Linux OpenStack Platform](#) - joins the more than 30 training courses Red Hat Training currently offers, including several [OpenStack training courses](#). This new course is for users intending to implement a network with Red Hat Enterprise Linux OpenStack Platform. The course will teach the basics of networking, routing, and bridging in Linux. Additionally, students will install, configure and use software-defined networks with Neutron on Red Hat Enterprise Linux OpenStack Platform.

Supporting Quote

Iain Gray, vice president, Services, Red Hat

"Given the strategic importance and rapid growth of OpenStack, we are excited to offer more advanced training for Red Hat Enterprise Linux OpenStack Platform. Right now there is a huge interest in OpenStack expertise and this new course provides a deeper dive into Neutron, a key component of the technology. With several more OpenStack-focused courses now in development, we aim to have the most robust and internationally available OpenStack curriculum in the market."

Forward-Looking Statements

Certain statements contained in this press release may constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements provide current expectations of future events based on certain assumptions and include any statement that does not directly relate to any historical or current fact. Actual results may differ materially from those indicated by such forward-looking statements as a result of various important factors, including: risks related to delays or reductions in information technology spending; the effects of industry consolidation; the ability of the Company to compete effectively; the integration of acquisitions and the ability to market successfully acquired technologies and products; uncertainty and adverse

results in litigation and related settlements; the inability to adequately protect Company intellectual property and the potential for infringement or breach of license claims of or relating to third party intellectual property; the ability to deliver and stimulate demand for new products and technological innovations on a timely basis; risks related to data and information security vulnerabilities; ineffective management of, and control over, the Company's growth and international operations; fluctuations in exchange rates; and changes in and a dependence on key personnel, as well as other factors contained in our most recent Quarterly Report on Form 10-Q (copies of which may be accessed through the Securities and Exchange Commission's website at <http://www.sec.gov>), including those found therein under the captions "Risk Factors" and "Management's Discussion and Analysis of Financial Condition and Results of Operations". In addition to these factors, actual future performance, outcomes, and results may differ materially because of more general factors including (without limitation) general industry and market conditions and growth rates, economic and political conditions, governmental and public policy changes and the impact of natural disasters such as earthquakes and floods. The forward-looking statements included in this press release represent the Company's views as of the date of this press release and these views could change. However, while the Company may elect to update these forward-looking statements at some point in the future, the Company specifically disclaims any obligation to do so. These forward-looking statements should not be relied upon as representing the Company's views as of any date subsequent to the date of this press release.
