

# Red Hat Brings Enterprise Linux Platform to AWS GovCloud

MAR 04, 2014

*With Red Hat Enterprise Linux now available in AWS GovCloud (US) region, Red Hat brings cloud agility to U.S. government agencies*

RALEIGH, N.C.--(BUSINESS WIRE)-- Red Hat, Inc. (NYSE: RHT), a leading provider of open source solutions, today announced that Red Hat Enterprise Linux is now available in the AWS GovCloud (US) region of Amazon Web Services (AWS). AWS GovCloud (US) enables U.S. government agencies and customers to move sensitive workloads into the cloud by addressing their specific regulatory and compliance requirements.

Red Hat Enterprise Linux is a scalable, high-performing enterprise operating platform for secure computing. With its unique Security-Enhanced Linux (SELinux) capabilities, Red Hat Enterprise Linux is widely deployed in U.S. government agencies. Additionally, Red Hat Enterprise Linux has completed 15 Common Criteria certifications across four hardware platforms, earning Red Hat a place at the top of the list of the industry's most certified operating systems, and giving customers confidence to turn to Red Hat for the expertise to deploy open source solutions at maximum security levels.

By making Red Hat Enterprise Linux available in the AWS GovCloud (U.S.) region, AWS GovCloud (US) customers can deploy sensitive workloads on the AWS cloud and benefit from the use of identical technology as Red Hat Enterprise Linux deployments in their on-premises datacenters. As a result, AWS GovCloud (US) customers will realize the added efficiencies of a standard operating environment across multiple deployment scenarios.

## Supporting Quotes

*Paul Smith, vice president and general manager, Public Sector, Red Hat*

"Government agencies need the ability to quickly access computing resources that clouds like AWS GovCloud (US) provide, while still deploying applications on Red Hat's secure platform, Red Hat Enterprise Linux. On AWS GovCloud (US), agencies can use Red Hat Enterprise Linux on demand, paying for only what they use, when they need it. As agencies determine their cloud strategies, the ability to use Red Hat Enterprise Linux for both on-premises deployments and in the cloud is game-changing."

*Teresa Carlson, vice president, Worldwide Public Sector, Amazon Web Services*

"We are pleased that Red Hat is making its Red Hat Enterprise Linux platform available to government customers and systems integrators leveraging the power and security of AWS GovCloud (US). With this, we offer our customers even greater choice and flexibility for secure deployments on the AWS cloud."

## Red Hat Forward-Looking Statements

Certain statements contained in this press release may constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements provide current expectations of future events based on certain

assumptions and include any statement that does not directly relate to any historical or current fact. Actual results may differ materially from those indicated by such forward-looking statements as a result of various important factors, including: risks related to delays or reductions in information technology spending; the effects of industry consolidation; the ability of the Company to compete effectively; the integration of acquisitions and the ability to market successfully acquired technologies and products; uncertainty and adverse results in litigation and related settlements; the inability to adequately protect Company intellectual property and the potential for infringement or breach of license claims of or relating to third party intellectual property; the ability to deliver and stimulate demand for new products and technological innovations on a timely basis; risks related to data and information security vulnerabilities; ineffective management of, and control over, the Company's growth and international operations; fluctuations in exchange rates; and changes in and a dependence on key personnel, as well as other factors contained in our most recent Quarterly Report on Form 10-Q (copies of which may be accessed through the Securities and Exchange Commission's website at <http://www.sec.gov>), including those found therein under the captions "Risk Factors" and "Management's Discussion and Analysis of Financial Condition and Results of Operations". In addition to these factors, actual future performance, outcomes, and results may differ materially because of more general factors including (without limitation) general industry and market conditions and growth rates, economic and political conditions, governmental and public policy changes and the impact of natural disasters such as earthquakes and floods. The forward-looking statements included in this press release represent the Company's views as of the date of this press release and these views could change. However, while the Company may elect to update these forward-looking statements at some point in the future, the Company specifically disclaims any obligation to do so. These forward-looking statements should not be relied upon as representing the Company's views as of any date subsequent to the date of this press release.

#### Amazon Forward-Looking Statements

This announcement contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. Actual results may differ significantly from management's expectations. These forward-looking statements involve risks and uncertainties that include, among others, risks related to competition, management of growth, new products, services and technologies, potential fluctuations in operating results, international expansion, outcomes of legal proceedings and claims, fulfillment and data center optimization, seasonality, commercial agreements, acquisitions and strategic transactions, foreign exchange rates, system interruption, inventory, government regulation and taxation, payments and fraud. More information about factors that potentially could affect Amazon.com's financial results is included in Amazon.com's filings with the Securities and Exchange Commission, including its most recent Annual Report on Form 10-K and subsequent filings.
