

Red Hat Announces Agenda for Red Hat Summit, the Industry's Premier Open Source Technology Event

MAR 21, 2013

Thousands of attendees expected at ninth annual Red Hat Summit in Boston to connect to an ecosystem of innovation

RALEIGH, N.C.--(BUSINESS WIRE)-- Red Hat, Inc. (NYSE:RHT), the world's leading provider of open source solutions, today announced Red Hat Summit 2013, the industry's premier open source technology event. Now in its ninth year, Red Hat Summit expects to welcome thousands of attendees to the Hynes Convention Center in Boston from June 11-14, 2013, to connect to an ecosystem of innovation. This year's agenda will feature Red Hat's entire portfolio of open source solutions with open hybrid cloud taking center stage. The agenda and registration for Red Hat Summit 2013 are now live at www.redhat.com/summit.

The world is more connected now than ever before. From smart phones to the cloud, technology enables people to communicate and do work with anyone, from anywhere, and advance innovation openly. As organizations embrace these changes, they also face another technological revolution – the move from hardware to software-based infrastructure. Red Hat Summit 2013 will explore how enterprises can "connect" to an ecosystem of innovation to support this shift in the IT landscape.

At Red Hat Summit 2013, attendees can be inspired by industry leaders and real world stories from organizations who will share how they are driving growth and innovation with Red Hat solutions. Featuring more than 160 sessions, Red Hat Summit attendees can attend visionary keynotes, participate in interactive sessions, see live demos, meet Red Hat's broad ecosystem of partners, collaborate with Red Hat engineers and community members, and build connections through networking opportunities.

Red Hat Summit 2013 features four days of content focused on many of the technology industry's hottest topics, including open hybrid cloud, big data, OpenStack, application development, and application and platform infrastructure. Sessions will showcase the latest open source developments in cloud computing, platform, virtualization, middleware, storage, and systems management technologies. New for 2013, Red Hat Summit will fully incorporate sessions on Red Hat JBoss Middleware, formerly hosted in the co-located JBoss World conference. Red Hat Summit attendees can also expect 25 percent more lab offerings than last year. Several pre-conference events are also scheduled, including Red Hat Connect Developer Exchange, [JUDCon](#), [CamelOne](#) and [Power Training](#).

Red Hat Summit 2013 will also feature 12 new tracks, including:

Business & IT strategy alignment - Attendees will learn how to align architecture and technology decisions for their specific business needs.

Cloud readiness – Attendees will learn how to maintain control, security and compliance when moving to hybrid cloud operational models.

Market perceptions and competition - Attendees will learn how Red Hat products stack up against proprietary offerings and fit within the broader industry landscape.

The road ahead – Attendees will get a look at some of the future developments Red Hat expects and learn how to better plan for shifts in the IT landscape.

Town hall – Will include panels of customers, engineers, partners and journalists.

Keynote addresses to come from Red Hat leaders including Jim Whitehurst, president and CEO; Paul Cormier, president, Products and Technologies; and Brian Stevens, CTO and vice president, Worldwide Engineering. Intel will serve as this year's platinum sponsor.

Attendees who register before May 3 can take advantage of the Early Bird discount - \$500 off on-site pricing. For more information, or to register for Red Hat Summit, visit www.redhat.com/summit.

Supporting Quotes

Paul Cormier, president, Products & Technologies, Red Hat

"Our ninth annual Red Hat Summit will be our largest event ever, and it's truly become one of the industry's 'can't miss' technology events of the year. We're looking forward to bringing customers, partners, and Red Hat executives and experts together to build connections and share the innovations that are driving the future of technology in the enterprise."

Forward-Looking Statements

Certain statements contained in this press release may constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements provide current expectations of future events based on certain assumptions and include any statement that does not directly relate to any historical or current fact. Actual results may differ materially from those indicated by such forward-looking statements as a result of various important factors, including: risks related to delays or reductions in information technology spending; the effects of industry consolidation; the ability of the Company to compete effectively; uncertainty and adverse results in litigation and related settlements; the integration of acquisitions and the ability to market successfully acquired technologies and products; the inability to adequately protect Company intellectual property and the potential for infringement or breach of license claims of or relating to third party intellectual property; the ability to deliver and stimulate demand for new products and technological innovations on a timely basis; risks related to data and information security vulnerabilities; ineffective management of, and control over, the Company's growth and international operations; fluctuations in exchange rates; and changes in and a dependence on key personnel, as well as other factors contained in our most recent Quarterly Report on Form 10-Q (copies of which may be accessed through the Securities and Exchange Commission's website at <http://www.sec.gov>), including those found therein under the captions "Risk Factors" and "Management's Discussion and Analysis of Financial Condition and Results of Operations". In addition to these factors, actual future performance, outcomes, and results may differ materially because of more general factors including (without limitation) general industry and market conditions and growth rates, economic and political conditions, governmental and public policy changes and the impact of natural disasters such as earthquakes and floods. The forward-looking statements included in this press release represent the Company's views as of the date of this press release and these views could change. However, while the Company may elect to update these forward-looking statements at some point in the future, the Company specifically disclaims any obligation to do so. These forward-looking statements should not be relied upon as representing the Company's views as of any date subsequent to the date of this press release.
