

Red Hat Introduces Fully Containerized API Management Platform

APR 25, 2017

On-premise release of Red Hat 3scale API Management delivers flexibility, scale and control

RALEIGH, N.C.--(BUSINESS WIRE)-- Red Hat, Inc. (NYSE: RHT), the world's leading provider of open source solutions, today introduced Red Hat 3scale API Management as a fully containerized, on-premise offering for end-to-end API lifecycle management. The on-premise release builds on the existing cloud-based SaaS offering and expands the deployment options available for the platform, providing organizations with a more powerful and flexible solution for managing application programming interfaces (APIs) at scale within their own datacenter.

As the first major release of the platform following Red Hat's June 2016 [acquisition of 3scale](#), Red Hat 3scale API Management - On Premise builds on Red Hat's vision to accelerate digital transformation and innovation with API-driven hybrid cloud architectures. Described as the “[new language of collaboration](#),” APIs serve as the building blocks underpinning today's hyperconnected economy, driven by mobile, the Internet of Things (IoT), and new application architectures such as containers and microservices.

Deploying Red Hat 3scale API Management on-premise via Red Hat OpenShift Container Platform enables customers to effectively manage the full lifecycle of their APIs without having to expose services externally, providing greater security and control to help meet regulatory requirements—all while taking advantage of powerful configuration, deployment, and administration capabilities for DevOps.

Named a leader in [Gartner's 2016 Magic Quadrant for Full Lifecycle API Management](#), Red Hat 3scale API Management provides the API-based architecture needed to support an agile integration approach for modern application development, alongside containers and distributed integration capabilities.

Availability

[Red Hat 3scale API Management](#) is expected to be available for download this week from the [Red Hat Customer Portal](#).

Supporting Quote

Steven Willmott, senior director and head of API Infrastructure, Red Hat

“Following the rise of mobile and IoT, the API economy is emerging as one of the key foundations of enterprise software platforms. With Red Hat 3scale API Management - On Premise, customers gain greater flexibility, choice and control over their API environment, enabling software teams to better focus on creating tangible business value.”

Forward-Looking Statements

Certain statements contained in this press release may constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements provide current expectations of future events based on certain

assumptions and include any statement that does not directly relate to any historical or current fact. Actual results may differ materially from those indicated by such forward-looking statements as a result of various important factors, including: risks related to the ability of the Company to compete effectively; the ability to deliver and stimulate demand for new products and technological innovations on a timely basis; delays or reductions in information technology spending; the integration of acquisitions and the ability to market successfully acquired technologies and products; fluctuations in exchange rates; the effects of industry consolidation; uncertainty and adverse results in litigation and related settlements; the inability to adequately protect Company intellectual property and the potential for infringement or breach of license claims of or relating to third party intellectual property; risks related to data and information security vulnerabilities; the ability to meet financial and operational challenges encountered in our international operations; ineffective management of, and control over, the Company's growth and international operations; and changes in and a dependence on key personnel, as well as other factors contained in our most recent Quarterly Report on Form 10-Q (copies of which may be accessed through the Securities and Exchange Commission's website at <http://www.sec.gov>), including those found therein under the captions "Risk Factors" and "Management's Discussion and Analysis of Financial Condition and Results of Operations". In addition to these factors, actual future performance, outcomes, and results may differ materially because of more general factors including (without limitation) general industry and market conditions and growth rates, economic and political conditions, governmental and public policy changes and the impact of natural disasters such as earthquakes and floods. The forward-looking statements included in this press release represent the Company's views as of the date of this press release and these views could change. However, while the Company may elect to update these forward-looking statements at some point in the future, the Company specifically disclaims any obligation to do so. These forward-looking statements should not be relied upon as representing the Company's views as of any date subsequent to the date of this press release.
