

Red Hat Developer Toolset 3.1 Now Available

APR 23, 2015

Latest, most stable versions of open source developer tools bridge developer productivity and production stability

RALEIGH, N.C.--(BUSINESS WIRE)-- Red Hat, Inc. (NYSE: RHT), the world's leading provider of open source solutions, today announced the general availability of Red Hat Developer Toolset 3.1, Red Hat's selection of some of the latest, stable open source C and C++ compilers and complementary development tools. Available through the Red Hat Enterprise Linux Developer Program and related subscriptions, Red Hat Developer Toolset 3.1 streamlines application development on the world's leading enterprise Linux platform, enabling developers to compile applications once and deploy across multiple versions of Red Hat Enterprise Linux.

New to Red Hat Developer Toolset 3.1 are:

- GNU Compiler Collection (GCC) 4.9.2, the latest stable upstream version of GCC, which provides numerous improvements and bug fixes
- Eclipse 4.4.2 with support for Java 8 and updated versions of Eclipse CDT (8.6), Eclipse Linux Tools (3.2), Eclipse Mylyn (3.14.2), and Eclipse EGit/JGit (3.6.1)
- Additional updated packages, including GDB 7.8.2, elfutils 0.161, memstomp 0.1.5, SystemTap 2.6, Valgrind 3.10.1, Dyninst 8.2.1, and ltrace 0.7.91.

As with all versions of Red Hat Developer Toolset, Red Hat Developer Toolset 3.1 allows for the creation of applications compatible with both Red Hat Enterprise Linux 6 and Red Hat Enterprise Linux 7 across physical, virtual and cloud environments, including OpenShift, Red Hat's award-winning Platform-as-a-Service (PaaS) offering. Additionally, these tools are delivered on a lifecycle separate from that of Red Hat Enterprise Linux, helping developers stay up-to-date with the latest innovations while retaining deployment stability.

Supporting Quotes

Jim Totton, vice president and general manager, Platforms Business Unit, Red Hat

"Across the open hybrid cloud, developers seek to leverage the latest and greatest development tools, but must balance this with the business's requirements for stable and reliable applications and systems. Red Hat Developer Toolset 3.1 helps bridge these needs, delivering developer innovation while retaining a stable foundation for the creation and support of mission-critical applications, helping to bring forth the next-generation of enterprise applications."

Forward-Looking Statements

Certain statements contained in this press release may constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements provide current expectations of future events based on certain assumptions and include any statement that does not directly relate to any historical or current fact. Actual results may differ materially from those indicated by such forward-looking statements as a result of various important factors, including: risks related to delays or reductions in information technology spending; the effects of industry consolidation; the ability of the Company to compete effectively; the integration of acquisitions and the ability to market successfully acquired technologies and products; uncertainty and adverse

results in litigation and related settlements; the inability to adequately protect Company intellectual property and the potential for infringement or breach of license claims of or relating to third party intellectual property; the ability to deliver and stimulate demand for new products and technological innovations on a timely basis; risks related to data and information security vulnerabilities; ineffective management of, and control over, the Company's growth and international operations; fluctuations in exchange rates; and changes in and a dependence on key personnel, as well as other factors contained in our most recent Quarterly Report on Form 10-Q (copies of which may be accessed through the Securities and Exchange Commission's website at <http://www.sec.gov>), including those found therein under the captions "Risk Factors" and "Management's Discussion and Analysis of Financial Condition and Results of Operations". In addition to these factors, actual future performance, outcomes, and results may differ materially because of more general factors including (without limitation) general industry and market conditions and growth rates, economic and political conditions, governmental and public policy changes and the impact of natural disasters such as earthquakes and floods. The forward-looking statements included in this press release represent the Company's views as of the date of this press release and these views could change. However, while the Company may elect to update these forward-looking statements at some point in the future, the Company specifically disclaims any obligation to do so. These forward-looking statements should not be relied upon as representing the Company's views as of any date subsequent to the date of this press release.
