

# OpenShift by Red Hat Named InfoWorld Technology of the Year Award Winner

JAN 29, 2015

*Red Hat's Platform-as-a-Service offering recognized as one of the year's best tools and technologies for developers, IT professionals, and businesses*

RALEIGH, N.C.--(BUSINESS WIRE)-- Red Hat, Inc. (NYSE: RHT), the world's leading provider of open source solutions, today announced that OpenShift by Red Hat, the company's Platform-as-a-Service (PaaS) offering, has received [InfoWorld's 2015 Technology of the Year award](#). The annual awards identify the best and most innovative products in the IT landscape, selected by IDG's InfoWorld Test Center editors and reviewers. Winners are drawn from all of the products tested by InfoWorld during the past year. OpenShift was the only PaaS offering - and one of the only open source offerings - to receive the award, emerging as the top PaaS offering in InfoWorld's testing. InfoWorld lauded OpenShift for its ability to support high application densities and standard continuous integration.

Red Hat is among the only technology vendors to offer a full family of open PaaS solutions: OpenShift Origin, the open source PaaS project; OpenShift Online, a commercial public PaaS offering; and OpenShift Enterprise, an on-premise private PaaS product. OpenShift delivers to developers a cloud application platform with a choice of programming languages, frameworks and application lifecycle tools to build and run their applications. The platform provides built-in support for Node.js, Ruby, Python, PHP, Perl, and Java and the capability for developers to add their own languages. OpenShift also supports many popular frameworks, including Java EE, Spring, Play and Rails.

The InfoWorld Technology of the Year award is the latest of several recent awards for OpenShift. Red Hat's PaaS offering received two Best of Open Source Software Awards in late 2014, honoring the best open source application development tools and best open source datacenter and cloud software. OpenShift also won the [2014 SIIA CODIE](#) Best Cloud Platform-as-a-Service award and the [2014 American Technology Awards](#).

## Supporting Quotes

*Ashesh Badani, vice president and general manager, OpenShift, Red Hat*

"I am thrilled that OpenShift was recognized by InfoWorld as one of the best technologies of the year, showcasing the application functionality it offers customers compared to competing offerings. These results echoed what we regularly hear in the field from customers and partners in their own product comparisons, supporting our goal of making OpenShift the industry's best PaaS offering."

## Forward-Looking Statements

Certain statements contained in this press release may constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements provide current expectations of future events based on certain assumptions and include any statement that does not directly relate to any historical or current fact. Actual results may differ materially from those indicated by such forward-looking statements as a result of various important factors, including: risks related to delays or reductions in information technology spending; the effects of industry consolidation; the ability of the Company to compete effectively; the integration of acquisitions and the ability to market successfully acquired technologies and products; uncertainty and adverse

results in litigation and related settlements; the inability to adequately protect Company intellectual property and the potential for infringement or breach of license claims of or relating to third party intellectual property; the ability to deliver and stimulate demand for new products and technological innovations on a timely basis; risks related to data and information security vulnerabilities; ineffective management of, and control over, the Company's growth and international operations; fluctuations in exchange rates; and changes in and a dependence on key personnel, as well as other factors contained in our most recent Quarterly Report on Form 10-Q (copies of which may be accessed through the Securities and Exchange Commission's website at <http://www.sec.gov>), including those found therein under the captions "Risk Factors" and "Management's Discussion and Analysis of Financial Condition and Results of Operations". In addition to these factors, actual future performance, outcomes, and results may differ materially because of more general factors including (without limitation) general industry and market conditions and growth rates, economic and political conditions, governmental and public policy changes and the impact of natural disasters such as earthquakes and floods. The forward-looking statements included in this press release represent the Company's views as of the date of this press release and these views could change. However, while the Company may elect to update these forward-looking statements at some point in the future, the Company specifically disclaims any obligation to do so. These forward-looking statements should not be relied upon as representing the Company's views as of any date subsequent to the date of this press release.
