

Red Hat Delivers Advanced Tooling and Community Resources to Software Developers

JUN 26, 2012

Red Hat Enterprise Linux Developer Program with Developer Suite Bridges Development Agility with Production Stability

RALEIGH, N.C. & BOSTON--(BUSINESS WIRE)-- Red Hat, Inc. (NYSE: RHT), the world's leading provider of open source solutions, today announced it has expanded its Red Hat Enterprise Linux Developer Program with enhancements to its Developer Suite, including a new toolset for software developers worldwide. Through the Red Hat Enterprise Linux Developer Suite, Red Hat delivers the latest, stable open source developer tool versions at an accelerated cadence than that of Red Hat Enterprise Linux. Developers now have access to a robust suite of tools with synchronized availability on Red Hat Enterprise Linux and Red Hat OpenShift™, allowing developers to deploy applications freely to either environment.

"For Linux programmers, having ready access to the latest, stable development tools is key to taking advantage of new Linux advancements," said Jim Totton, vice president and general manager, Platform Business Unit, Red Hat, Inc. "The Red Hat Enterprise Linux Developer Program makes it easy for developers to access industry-leading developer tools, instructional resources and an ecosystem of experts to help Linux programmers maximize productivity in building great Red Hat Enterprise Linux applications."

Designed for many types of Linux developers, including Independent Software Vendors (ISVs), software solution providers, Systems Integrators (SIs), enterprise, and government software developers, the Red Hat Enterprise Linux Developer Suite enhances developer productivity and improves time to deployment by providing affordable access and updates to essential development tools. The latest, stable tooling can be used to develop applications on Red Hat Enterprise Linux whether on-premise or off-premise in physical, virtual and cloud deployments, and on OpenShift, the leading open Platform-as-a-Service (PaaS).

The Red Hat Enterprise Linux Developer Suite includes:

Red Hat Enterprise Linux, variants, and related Add-On software for development use including Red Hat Enterprise Linux, High-Availability Add-On, Load Balancer Add-On, Resilient Storage Add-On, Scalable File System Add-On, High-Performance Network Add-On, Extended Update Support, and MRG Real Time and Smart Management Add-on.

Red Hat Enterprise Linux Developer toolset, a collection of development tools to create highly scalable applications. Delivered as part of the Developer Suite, Red Hat plans to accelerate the release cadence of these tools to deliver the latest, stable open source developer tool versions on a separate life cycle from Red Hat Enterprise Linux releases.

The first version of the Red Hat Enterprise Linux Developer Suite includes a toolset that makes developing Linux software applications faster and easier by allowing users to compile once and deploy to multiple versions of Red Hat Enterprise Linux. Using the developer toolset, software developers can now develop Linux applications using the latest C and C++ upstream tools. These tools include the latest GNU Compiler Collection (GCC 4.7) with support for C and C++; the latest version of the GNU Project Debugger (GDB 7.4) with improvements to aid the debugging of applications; and the GNU binutils collection of binary developer tools, version 2.22, for the creation and management of Linux applications.

"The velocity of development is as high today as it has ever been, which means that developers are putting a premium on a toolchain that is current from libraries to compiler," said Stephen O'Grady, Principal Analyst with RedMonk. "With its expanded Red Hat Enterprise Linux Developer Program and toolset, Red Hat aims to provide developers with just that."

The self-supported Red Hat Enterprise Linux Developer Suite and the Red Hat Enterprise Linux Developer Support Subscriptions are available immediately worldwide. Red Hat customers and partners can join the developer online user group on Red Hat's award-winning [customer portal](#) to access the extensive knowledgebase and recommended practices.

About Red Hat, Inc.

Red Hat is the world's leading provider of open source software solutions, taking a community-powered approach to reliable and high-performing cloud, Linux, middleware, storage and virtualization technologies. Red Hat also offers award-winning support, training, and

consulting services. As the connective hub in a global network of enterprises, partners, and open source communities, Red Hat helps create relevant, innovative technologies that liberate resources for growth and prepare customers for the future of IT. Learn more at <http://www.redhat.com>.

Forward-Looking Statements

Certain statements contained in this press release may constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements provide current expectations of future events based on certain assumptions and include any statement that does not directly relate to any historical or current fact. Actual results may differ materially from those indicated by such forward-looking statements as a result of various important factors, including: risks related to delays or reductions in information technology spending; the effects of industry consolidation; the ability of the Company to compete effectively; uncertainty and adverse results in litigation and related settlements; the integration of acquisitions and the ability to market successfully acquired technologies and products; the inability to adequately protect Company intellectual property and the potential for infringement or breach of license claims of or relating to third party intellectual property; the ability to deliver and stimulate demand for new products and technological innovations on a timely basis; risks related to data and information security vulnerabilities; ineffective management of, and control over, the Company's growth and international operations; fluctuations in exchange rates; and changes in and a dependence on key personnel, as well as other factors contained in our most recent Annual Report on Form 10-K (copies of which may be accessed through the Securities and Exchange Commission's website at <http://www.sec.gov>), including those found therein under the captions "Risk Factors" and "Management's Discussion and Analysis of Financial Condition and Results of Operations". In addition to these factors, actual future performance, outcomes, and results may differ materially because of more general factors including (without limitation) general industry and market conditions and growth rates, economic and political conditions, governmental and public policy changes and the impact of natural disasters such as earthquakes and floods. The forward-looking statements included in this press release represent the Company's views as of the date of this press release and these views could change. However, while the Company may elect to update these forward-looking statements at some point in the future, the Company specifically disclaims any obligation to do so. These forward-looking statements should not be relied upon as representing the Company's views as of any date subsequent to the date of this press release.
