

Red Hat Launches Mobile Application Platform

JUN 23, 2015

Red Hat Mobile Application Platform integrates mobile-centric workloads with existing IT infrastructure

BOSTON--(BUSINESS WIRE)-- Red Hat, Inc. (NYSE: RHT), the world's leading provider of open source solutions, today introduced the Red Hat Mobile Application Platform, which incorporates technology from the October 2014 [acquisition of FeedHenry](#) with products from Red Hat's JBoss Middleware and OpenShift PaaS portfolio, and adds new mobile services. The platform offers enterprises a full technology stack to enable mobile-centric workloads to integrate with existing IT infrastructures, reducing the complexity and increasing agility across mobile development and deployment cycles.

The [Red Hat Mobile Application Platform](#) helps simplify and accelerate the development, integration, deployment, and management of mobile solutions by allowing collaboration across development teams, such as front-end application developers, back-end IT integration, and DevOps teams. Red Hat also announced the availability of a developer offering in its public cloud application development and hosting environment, [OpenShift Online](#). Full support for the Red Hat Mobile Application Platform in production environments via OpenShift Enterprise is planned for the coming year.

The Red Hat Mobile Application Platform provides mobile capabilities that include security, reusable connections to back-end systems, and collaborative/agile app development. In extending highly complex and sophisticated applications to mobile devices, Red Hat believes that the defining factors of the next generation of PaaS capabilities will be a rich set of middleware services. In bringing the Mobile Application Platform to OpenShift, Red Hat aims to position itself for this and further advance the Red Hat [xPaaS services vision](#).

Staying true to its commitment to the spirit of open source, Red Hat also announced plans to help establish an open source upstream project that will carry the FeedHenry name and focus on the development of cutting-edge open source mobile technologies, which will include FeedHenry mobile application platform technology, open sourced by Red Hat. The community is expected to launch in the coming year.

Supporting Quotes

Cathal McGloin, vice president, Mobile Platforms, Red Hat

"Red Hat is one of the only companies that can deliver and support the components needed to run the highly scalable workloads required by today's digital business. The Red Hat Mobile Application Platform delivers vital mobile capabilities and secure, manageable integration with enterprise systems from a single, trusted, and award winning provider of enterprise middleware, cloud, and mobile solutions."

Certain statements contained in this press release may constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements provide current expectations of future events based on certain assumptions and include any statement that does not directly relate to any historical or current fact. Actual results may differ materially from those indicated by such forward-looking statements as a result of various important factors, including: risks related to the ability of the Company to compete effectively; the ability to deliver and stimulate demand for new products and technological innovations on a timely basis; delays or reductions in information technology spending; the effects of industry consolidation; the integration of acquisitions and the ability to market successfully acquired technologies and products; uncertainty and adverse results in litigation and related settlements; the inability to adequately protect Company intellectual property and the potential for infringement or breach of license claims of or relating to third party intellectual property; risks related to data and information security vulnerabilities; ineffective management of, and control over, the Company's growth and international operations; fluctuations in exchange rates; and changes in and a dependence on key personnel, as well as other factors contained in our most recent Annual Report on Form 10-K (copies of which may be accessed through the Securities and Exchange Commission's website at <http://www.sec.gov>), including those found therein under the captions "Risk Factors" and "Management's Discussion and Analysis of Financial Condition and Results of Operations". In addition to these factors, actual future performance, outcomes, and results may differ materially because of more general factors including (without limitation) general industry and market conditions and growth rates, economic and political conditions, governmental and public policy changes and the impact of natural disasters such as earthquakes and floods. The forward-looking statements included in this press release represent the Company's views as of the date of this press release and these views could change. However, while the Company may elect to update these forward-looking statements at some point in the future, the Company specifically disclaims any obligation to do so. These forward-looking statements should not be relied upon as representing the Company's views as of any date subsequent to the date of this press release.
