

# INTTRA Powers Business Processes and Delivers Customer Value with Red Hat JBoss Middleware Solutions

APR 03, 2012

*Leading shipping industry e-commerce provider to use suite of Red Hat's Middleware solutions for business rules management, ESB, and enterprise application processes*

RALEIGH, N.C. & PARSIPPANY, N.J.--(BUSINESS WIRE)-- Red Hat, Inc. (NYSE: RHT), the world's leading provider of open source solutions, and INTTRA, the world's largest multi-carrier e-commerce network for ocean freight, today announced that INTTRA will implement several solutions from the Red Hat JBoss Middleware portfolio to enhance and speed the delivery of business solutions for the shipping industry.

INTTRA selected several Red Hat solutions to achieve this goal, including JBoss Enterprise BRMS, JBoss Enterprise SOA Platform (ESB), JBoss Enterprise Application Platform, JBoss Operations Network, and Red Hat Enterprise Linux. INTTRA intends to use the solutions to facilitate more streamlined, automated interactions with its customers by leveraging business rules driven processes. INTTRA's customers include more than 30 of the world's leading ocean carriers. With the addition of Red Hat, INTTRA will be able to more easily control and manage each of its application components, resulting in faster software delivery, greater application flexibility and reduced management costs.

"We were looking for sophisticated yet intuitive solutions to help us better manage the processes and data we use to provide services to our large ocean freight network. Red Hat JBoss Middleware Solutions offered the best features to suit our needs, as well as a very attractive subscription approach," said Anthony Costa, vice president, Technology and Customer Experience, INTTRA. "The implementation of these Red Hat solutions will help automate our system's decision-making processes and assist in managing complex events more effectively."

The Red Hat solutions INTTRA will be using are designed to create a fully integrated, intelligent enterprise. JBoss Enterprise BRMS is a comprehensive platform for the development, deployment and management of business rules and events; JBoss Enterprise SOA Platform integrates and orchestrates a wide range of applications, services and business processes; and JBoss Enterprise Application Platform helps enterprises build, host and deploy enterprise Java applications and services.

"The fact that the world's largest multi-carrier e-commerce provider has selected Red Hat is a testament to the scalability and efficiency of our Middleware platforms to solve high-value business challenges," said Craig Muzilla, vice president and general manager, Middleware, Red Hat. "We're thrilled to be working with INTTRA, and look forward to providing them with a wide range of integration and application development and deployment solutions that can serve their needs for years to come."

Forward-Looking Statements

Certain statements contained in this press release may constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements provide current expectations of future events based on certain assumptions and include any statement that does not directly relate to any historical or current fact. Actual results may differ materially from those indicated by such forward-looking statements as a result of various important factors, including: risks related to delays or reductions in information technology spending; the effects of industry consolidation; the ability of the Company to compete effectively; uncertainty and adverse results in litigation and related settlements; the integration of acquisitions and the ability to market successfully acquired technologies and products; the inability to adequately protect Company intellectual property and the potential for

infringement or breach of license claims of or relating to third party intellectual property; the ability to deliver and stimulate demand for new products and technological innovations on a timely basis; risks related to data and information security vulnerabilities; ineffective management of, and control over, the Company's growth and international operations; fluctuations in exchange rates; and changes in and a dependence on key personnel, as well as other factors contained in our most recent Quarterly Report on Form 10-Q (copies of which may be accessed through the Securities and Exchange Commission's website at <http://www.sec.gov>), including those found therein under the captions "Risk Factors" and "Management's Discussion and Analysis of Financial Condition and Results of Operations". In addition to these factors, actual future performance, outcomes, and results may differ materially because of more general factors including (without limitation) general industry and market conditions and growth rates, economic and political conditions, governmental and public policy changes and the impact of natural disasters such as earthquakes and floods. The forward-looking statements included in this press release represent the Company's views as of the date of this press release and these views could change. However, while the Company may elect to update these forward-looking statements at some point in the future, the Company specifically disclaims any obligation to do so. These forward-looking statements should not be relied upon as representing the Company's views as of any date subsequent to the date of this press release.
