

Red Hat Rolls Out New JBoss Developer Subscription, Resources, and Technology

SEP 29, 2014

Initiative reflects continued commitment to help enterprise application developers work quickly and effectively

RALEIGH, N.C.--(BUSINESS WIRE)-- Red Hat, Inc. (NYSE: RHT), the world's leading provider of open source solutions, today unveiled a new developer subscription program and resources for members of the JBoss Developer community. In conjunction, Red Hat launched the next version of its award-winning integrated development environment, [JBoss Developer Studio](#). As business is increasingly defined and differentiated by IT—and specifically the software and services it provides—developers are on the front lines of innovation in the enterprise. Together, the new subscription program, resources, and technology offerings reinforce Red Hat's commitment to help developers work quickly and effectively.

No-Cost JBoss Developer Subscription

The new JBoss Developer program is a no-cost subscription designed to improve the accessibility of Red Hat's enterprise-grade open source middleware technologies for developer use. The program gives developers more choice and flexibility in terms of the technologies they start with, and enables them to better plan and prepare for future deployment into production environments. Under the new program, Red Hat JBoss Middleware products are available for download by members of the JBoss Developer community to use in the construction of their own applications, without a paid subscription. Non-development use will require a paid subscription, which provides additional benefits such as full support, security, and updates.

Red Hat JBoss Developer Studio 8

JBoss Developer Studio is an integrated development environment designed to support the full application development lifecycle. Version 8 introduces support for [AngularJS](#) and [Ionic](#) for building Apache Cordova (HTML5 hybrid) mobile applications. Based on the latest version of Eclipse, JBoss Developer Studio 8 also introduces [Forge 2](#), which adds a new wizard-driven approach to code generation. A candidate release of JBoss Developer Studio 8 is available for download now. Red Hat expects the product to be generally available in fall 2014.

JBoss Developer Community Resources

In support of its developer initiative, Red Hat unveiled a major refresh of the JBoss Developer community site. The site, which currently has more than 289,000 users, is designed to be a one-stop shop for enterprise developers and provides a central location for information related to community projects, access to Red Hat's enterprise middleware products under the new subscription, as well as support resources to help developers create and deploy applications using Red Hat JBoss Middleware.

Site highlights include quickstarts, tutorials, and reference architectures, as well as exclusive content and access to enterprise forums. Developers can expect to see additional content and resources added to the site over time, including new training courses, solutions, and demonstrations involving multiple technologies.

Supporting Quotes

Mike Piech, general manager, Middleware, Red Hat

"Red Hat is fully committed to working in and through communities to create better technologies the open source way. We are reinforcing that commitment through the new JBoss Developer community site and no-cost product subscription. Community-powered innovation is central to the success of these technologies and Red Hat has built its middleware portfolio around the mantra that JBoss is, and will continue to be, by developers and for developers."

Forward-Looking Statements

Certain statements contained in this press release may constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements provide current expectations of future events based on certain assumptions and include any statement that does not directly relate to any historical or current fact. Actual results may differ materially from those indicated by such forward-looking statements as a result of various important factors, including: risks related to delays or reductions in information technology spending; the effects of industry consolidation; the ability of the Company to compete effectively; the integration of acquisitions and the ability to market successfully acquired technologies and products; uncertainty and adverse results in litigation and related settlements; the inability to adequately protect Company intellectual property and the potential for infringement or breach of license claims of or relating to third party intellectual property; the ability to deliver and stimulate demand for new products and technological innovations on a timely basis; risks related to data and information security vulnerabilities; ineffective management of, and control over, the Company's growth and international operations; fluctuations in exchange rates; and changes in and a dependence on key personnel, as well as other factors contained in our most recent Quarterly Report on Form 10-Q (copies of which may be accessed through the Securities and Exchange Commission's website at <http://www.sec.gov>), including those found therein under the captions "Risk Factors" and "Management's Discussion and Analysis of Financial Condition and Results of Operations". In addition to these factors, actual future performance, outcomes, and results may differ materially because of more general factors including (without limitation) general industry and market conditions and growth rates, economic and political conditions, governmental and public policy changes and the impact of natural disasters such as earthquakes and floods. The forward-looking statements included in this press release represent the Company's views as of the date of this press release and these views could change. However, while the Company may elect to update these forward-looking statements at some point in the future, the Company specifically disclaims any obligation to do so. These forward-looking statements should not be relied upon as representing the Company's views as of any date subsequent to the date of this press release.
