

Red Hat Enterprise Linux for SAP HANA® Available on Amazon Web Services

JUL 01, 2015

Solution listing in AWS Marketplace provides additional deployment choices for implementations of the SAP HANA platform

RALEIGH, N.C.--(BUSINESS WIRE)-- Red Hat, Inc. (NYSE: RHT), the world's leading provider of open source solutions, today announced that Red Hat Enterprise Linux for SAP HANA® has expanded its availability to Amazon Web Services (AWS). This availability as a listing in the AWS Marketplace provides customers with additional deployment options for their big data workloads, adding more choice to an ecosystem of hardware and cloud configurations. In addition to Red Hat Enterprise Linux, customers can also use their own subscriptions to deploy on AWS with Red Hat Cloud Access for Red Hat JBoss Enterprise Application Platform, JBoss Enterprise Web Server, OpenShift by Red Hat and Red Hat Gluster Storage.

Announced in June 2014 as the foundation of an enhanced collaboration between Red Hat and SAP, Red Hat Enterprise Linux for SAP HANA offers an open, scalable, integrated and highly available platform featuring the industry-leading reliability, quality and stability of Red Hat Enterprise Linux. Red Hat Enterprise Linux for SAP HANA helps organizations make smarter, faster decisions; accelerate business processes; and enable consistency of operations across the business through standardization on the Red Hat platform, which powers mission-critical systems in more than 90 percent of the global Fortune 500.

Red Hat certified cloud and service providers offer Red Hat Enterprise Linux for SAP HANA to help enterprises leverage the stability, security and reliability of the world's leading enterprise Linux platform upon which to run their public cloud-based big data workloads. With Red Hat Enterprise Linux available in AWS Marketplace, customers can harness on-demand analytical processing power while helping to reduce the overall cost of extreme data workloads, all backed by the support of Red Hat Enterprise Linux.

Supporting Quotes

Jim Totton, vice president and general manager, Platforms Business Unit, Red Hat

"The addition of Red Hat Enterprise Linux for SAP HANA in AWS Marketplace answers enterprise IT's demands for choice when it comes to deploying big data solutions. Now with many implementation options, ranging from bare-metal hardware to vast, scalable operations in the cloud, Red Hat Enterprise Linux for SAP HANA can fit nearly every enterprise big-data scenario, from the mundane to the extreme, helping our customers leverage the power, stability and flexibility of the world's leading enterprise Linux platform across their entire infrastructure."

Terry Wise, vice president, Worldwide Partner Ecosystem, Amazon Web Services, Inc

"We are pleased to see Red Hat Enterprise Linux for SAP HANA made accessible for AWS customers via a listing in AWS Marketplace. With Red Hat Enterprise Linux for SAP HANA available in AWS Marketplace, customers have an additional choice for running highly scalable, big data applications in production on AWS."

Forward-Looking Statements

Certain statements contained in this press release may constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements provide current expectations of future events based on certain assumptions and include any statement that does not directly relate to any historical or current fact. Actual results may differ materially from those indicated by such forward-looking statements as a result of various important factors, including: risks related to the ability of the Company to compete effectively; the ability to deliver and stimulate demand for new products and technological innovations on a timely basis; delays or reductions in information technology spending; the effects of industry consolidation; the integration of acquisitions and the ability to market successfully acquired technologies and products; uncertainty and adverse results in litigation and related settlements; the inability to adequately protect Company intellectual property and the potential for infringement or breach of license claims of or relating to third party intellectual property; risks related to data and information security vulnerabilities; ineffective management of, and control over, the Company's growth and international operations; fluctuations in exchange rates; and changes in and a dependence on key personnel, as well as other factors contained in our most recent Annual Report on Form 10-K (copies of which may be accessed through the Securities and Exchange Commission's website at <http://www.sec.gov>), including those found therein under the captions "Risk Factors" and "Management's Discussion and Analysis of Financial Condition and Results of Operations." In addition to these factors, actual future performance, outcomes, and results may differ materially because of more general factors including (without limitation) general industry and market conditions and growth rates, economic and political conditions, governmental and public policy changes and the impact of natural disasters such as earthquakes and floods. The forward-looking statements included in this press release represent the Company's views as of the date of this press release and these views could change. However, while the Company may elect to update these forward-looking statements at some point in the future, the Company specifically disclaims any obligation to do so. These forward-looking statements should not be relied upon as representing the Company's views as of any date subsequent to the date of this press release.
