

# Red Hat Launches Integration Capabilities with SAP® Solutions as Part of The JBoss Way

OCT 16, 2012

*Integration provides new functionality to enhance developer productivity*

LAS VEGAS--(BUSINESS WIRE)-- Red Hat, Inc. (NYSE: RHT), the world's leading provider of open source solutions, today announced new integration capabilities for SAP® solutions as part of The JBoss Way, a development approach that provides developers a more productive and simpler way to develop modern applications. The collaboration is an effort to enhance interoperability between Red Hat and SAP solutions, and provides capabilities that make it easier to consume SAP application data and business processes from Red Hat's JBoss Enterprise SOA Platform, JBoss Enterprise Data Services Platform, or JBoss Enterprise Application Platform.

"The long-standing collaboration between Red Hat and SAP is thriving, and integration between technologies from both companies is a great example of what The JBoss Way was designed for," said Craig Muzilla, vice president and general manager, Middleware, Red Hat. "The aim of this integration is a more intelligent, integrated enterprise – one that can maximize the value of data assets and accelerate business decisions. Ultimately, our goal is to enable developers to innovate faster and create transformative applications that have real business impact."

The integration is done via SAP NetWeaver® Gateway technology, which provides a simple way to connect devices, environments and platforms to SAP software based on open standards. It offers connectivity to SAP applications using any programming language or model without the need for knowledge of SAP solutions by leveraging REST services and OData and/or ATOM protocols.

"SAP and Red Hat both support open standards, such as HTML5, REST and OData, and frequently join forces in standards-based consortia," said Adi Kavalur, vice president, Product Management, SAP. "The support of SAP solutions in the JBoss Enterprise Middleware portfolio – for consuming SAP NetWeaver Gateway-provisioned, REST-based OData services – underscores our cooperation in the open community and is a welcome and encouraging step for customers and developers."

Introduced in June 2012, The JBoss Way encompasses a new set of frameworks, tools and architectural designs focused on improving developer productivity in building modern applications for mobile, the cloud and more. JBoss Enterprise Middleware gives businesses a choice of scalable and high-performance application development frameworks and platforms needed to build effective enterprise Java applications and services. The portfolio features a comprehensive suite of development tooling to construct customer Java applications, including those that extract data from SAP NetWeaver.

## SAP Forward-looking Statement

Any statements contained in this document that are not historical facts are forward-looking statements as defined in the U.S. Private Securities Litigation Reform Act of 1995. Words such as "anticipate," "believe," "estimate," "expect," "forecast," "intend," "may," "plan," "project," "predict," "should" and "will" and similar expressions as they relate to SAP are intended to identify such forward-looking statements. SAP undertakes no obligation to publicly update or revise any forward-looking statements. All forward-looking statements are subject to various risks and uncertainties that could cause actual results to differ materially from expectations. The factors that could affect SAP's future financial results are discussed more fully in SAP's filings with the U.S. Securities and Exchange Commission ("SEC"), including SAP's most recent Annual Report on Form 20-F filed with the SEC. Readers are cautioned not to place undue reliance on these forward-looking statements, which speak only as of their dates.

## Red Hat Forward-Looking Statements

Certain statements contained in this press release may constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements provide current expectations of future events based on certain assumptions and include any statement that does not directly relate to any historical or current fact. Actual results may differ materially from those indicated by such forward-looking statements as a result of various important factors, including: risks related to delays or reductions in information technology spending; the effects of industry consolidation; the ability of the Company to compete effectively; uncertainty and adverse results in litigation and related settlements; the integration of acquisitions and the ability to market successfully acquired technologies and products; the inability to adequately protect Company intellectual property and the potential for infringement or breach of license claims of or relating to third party intellectual property; the ability to deliver and stimulate demand for new products and technological innovations on a timely basis; risks related to data and information security vulnerabilities; ineffective management of, and control over, the Company's growth and international operations; fluctuations in exchange rates; and changes in and a dependence on key personnel, as well as other factors contained in our most recent Quarterly Report on Form 10-Q (copies of which may be accessed through the Securities and Exchange Commission's website at <http://www.sec.gov>), including those found therein under the captions "Risk Factors" and "Management's Discussion and Analysis of Financial Condition and Results of Operations". In addition to these factors, actual future performance, outcomes, and results may differ materially because of more general factors including (without limitation) general industry and market conditions and growth rates, economic and political conditions, governmental and public policy changes and the impact of natural disasters such as earthquakes and floods. The forward-looking statements included in this press release represent the Company's views as of the date of this press release and these views could change. However, while the Company may elect to update these forward-looking statements at some point in the future, the Company specifically disclaims any obligation to do so. These forward-looking statements should not be relied upon as representing the Company's views as of any date subsequent to the date of this press release.
