

Red Hat Brings OpenShift Online Platform-as-a-Service to 14 New Countries, Expands Gear Size Offerings for Developers

NOV 11, 2013

Red Hat introduces new pricing for fully supported public PaaS offering

LAS VEGAS--(BUSINESS WIRE)-- AWS RE:INVENT - Red Hat, Inc. (NYSE: RHT), the world's leading provider of open source solutions, today announced the next step in the continued expansion of its award-winning commercial public Platform-as-a-Service (PaaS) offering, OpenShift Online. In the last year, OpenShift Online has experienced significant momentum, growing its user base by 259 percent and its application count by 322 percent year-over-year. With today's announcement, Red Hat is expanding OpenShift Online's global availability, and introducing new pricing and memory options.

OpenShift Online enables developers to quickly build, launch and host innovative applications in the public cloud. The elastic, multi-language, PaaS architecture of OpenShift Online automates the provisioning, management and scaling of applications so developers can focus on writing the code for these applications for their business, startup, or next big idea. As a polyglot PaaS, OpenShift's support for multiple languages, including Java, Ruby, PHP, Python, Node.js, and Perl, allows for a low barrier to entry so developers can start their project with ease and start coding faster. OpenShift Online is built from the OpenShift Origin open source project which also serves as the base for OpenShift Enterprise, Red Hat's commercial Private PaaS offering. It leverages Red Hat Enterprise Linux and the SELinux subsystem for a secure, multi-tenant architecture. Users and ISV partners can also take advantage of [third-party extensions](#) or build their own through OpenShift's extensible, pluggable cartridge framework.

Responding to customer demand for a supported, enterprise-class public PaaS offering, Red Hat introduced OpenShift Online's commercial offering – known as the Silver tier – in June 2013, giving users access to technical support and additional platform resources from the world's top Linux administrators and JBoss developers. With today's announcement, Red Hat is expanding Silver tier availability to 14 new Eurozone countries, including Greece, Poland, Bulgaria, Romania, Czech Republic, Hungary, Slovakia, Croatia, Slovenia, Lithuania, Estonia, Latvia, Cyprus and Malta. With this expansion, Red Hat's world-class technical support and additional platform resources is available for developers and application providers in more than 30 countries.

Additionally, with today's announcement, Red Hat is lowering OpenShift Online's gear/hour pricing by 50 percent and providing additional gear sizes to host larger applications. With this change, gear/hour prices now range from just \$0.02 cents to \$0.10. In addition to Small (512 MB) and Medium (1GB) gears, developers can now choose Large (2GB) gears, offering them a larger memory option to run their most demanding applications. Developers can now build and host applications more efficiently than ever, without sacrificing development time to tune application efficiency or scalability.

Red Hat also continues driving new features and functionality in OpenShift Online every month. Most recently, Red Hat added support for group membership and user management to enhance multi-developer collaboration. Other recent updates include enhanced support for environment variables and updates to multiple OpenShift cartridges including Python, Node.js and Postgresql. For more details on all the latest features in OpenShift Online, see <https://www.openshift.com/blogs/new-openshift-online-features-roundup>.

Availability

New gear/hour pricing for OpenShift Online is effective immediately. Additional memory options and expanded global access to OpenShift Online will be available in December 2013. Pricing and technical details are available via the [OpenShift website](#).

About Red Hat, Inc.

Red Hat is the world's leading provider of open source software solutions, taking a community-powered approach to reliable and high-performing cloud, Linux, middleware, storage and virtualization technologies. Red Hat also offers award-winning support, training, and

consulting services. As the connective hub in a global network of enterprises, partners, and open source communities, Red Hat helps create relevant, innovative technologies that liberate resources for growth and prepare customers for the future of IT. Learn more at <http://www.redhat.com>.

Forward-Looking Statements

Certain statements contained in this press release may constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements provide current expectations of future events based on certain assumptions and include any statement that does not directly relate to any historical or current fact. Actual results may differ materially from those indicated by such forward-looking statements as a result of various important factors, including: risks related to delays or reductions in information technology spending; the effects of industry consolidation; the ability of the Company to compete effectively; the integration of acquisitions and the ability to market successfully acquired technologies and products; uncertainty and adverse results in litigation and related settlements; the inability to adequately protect Company intellectual property and the potential for infringement or breach of license claims of or relating to third party intellectual property; the ability to deliver and stimulate demand for new products and technological innovations on a timely basis; risks related to data and information security vulnerabilities; ineffective management of, and control over, the Company's growth and international operations; fluctuations in exchange rates; and changes in and a dependence on key personnel, as well as other factors contained in our most recent Quarterly Report on Form 10-Q (copies of which may be accessed through the Securities and Exchange Commission's website at <http://www.sec.gov>), including those found therein under the captions "Risk Factors" and "Management's Discussion and Analysis of Financial Condition and Results of Operations". In addition to these factors, actual future performance, outcomes, and results may differ materially because of more general factors including (without limitation) general industry and market conditions and growth rates, economic and political conditions, governmental and public policy changes and the impact of natural disasters such as earthquakes and floods. The forward-looking statements included in this press release represent the Company's views as of the date of this press release and these views could change. However, while the Company may elect to update these forward-looking statements at some point in the future, the Company specifically disclaims any obligation to do so. These forward-looking statements should not be relied upon as representing the Company's views as of any date subsequent to the date of this press release.
