

Red Hat Announces Red Hat Storage Integration with Red Hat OpenStack

JUN 13, 2013

Enterprises Benefit From Seamless Customer Support; Converged Storage and Compute Infrastructure Building Block to the Open Hybrid Cloud

RALEIGH, N.C. & BOSTON--(BUSINESS WIRE)-- RED HAT SUMMIT 2013

Red Hat, Inc. (NYSE: RHT), the world's leading provider of open source solutions, today announced the integration of Red Hat Storage and Red Hat OpenStack to provide customers with a proven storage and compute solution with the benefit of being engineered and supported in concert by one company. Red Hat Storage and Red Hat OpenStack give customers a full-featured storage and compute solution today, a platform for innovation tomorrow, and a smooth support experience during the journey to open hybrid cloud.

Using Red Hat Storage and Red Hat OpenStack make it easier to deploy and manage the enterprise and public cloud with its unified storage services for OpenStack supporting Block Storage (Cinder), Image Service (Glance) and Object Storage (Swift) from the same storage pool. Red Hat Storage has the ability to run storage and compute services on the same physical or virtual server to further reduce the cost of OpenStack infrastructure. Red Hat's open software-defined storage capabilities that run exclusively in user space is a key enabler for future OpenStack storage innovation like File-as-a-Service and Hadoop running on OpenStack. Red Hat expects to be a catalyst in driving community-driven innovation in these and other areas with the goal of delivering the best functionality and user experience for enterprises deploying storage in an open source cloud infrastructure.

Ranga Rangachari, vice president and general manager, Storage, Red Hat, said, "Enterprise customers running mission-critical workloads on the private cloud are interested in a Red Hat-engineered stack to make sure their OpenStack cloud platform deployments are tightly integrated and tested to work effectively right from the start. With Red Hat OpenStack and Red Hat Storage, customers have the piece of mind that they are implementing a proven enterprise solution today, designed for future innovation, that is completely engineered and supported by one company – Red Hat."

Forward-Looking Statements

Certain statements contained in this press release may constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements provide current expectations of future events based on certain assumptions and include any statement that does not directly relate to any historical or current fact. Actual results may differ materially from those indicated by such forward-looking statements as a result of various important factors, including: risks related to delays or reductions in information technology spending; the effects of industry consolidation; the ability of the Company to compete effectively; the integration of acquisitions and the ability to market successfully acquired technologies and products; uncertainty and adverse results in litigation and related settlements; the inability to adequately protect Company intellectual property and the potential for infringement or breach of license claims of or relating to third party intellectual property; the ability to deliver and stimulate demand for new products and technological innovations on a timely basis; risks related to data and information security vulnerabilities; ineffective

management of, and control over, the Company's growth and international operations; fluctuations in exchange rates; and changes in and a dependence on key personnel, as well as other factors contained in our most recent Annual Report on Form 10-K (copies of which may be accessed through the Securities and Exchange Commission's website at <http://www.sec.gov>), including those found therein under the captions "Risk Factors" and "Management's Discussion and Analysis of Financial Condition and Results of Operations". In addition to these factors, actual future performance, outcomes, and results may differ materially because of more general factors including (without limitation) general industry and market conditions and growth rates, economic and political conditions, governmental and public policy changes and the impact of natural disasters such as earthquakes and floods. The forward-looking statements included in this press release represent the Company's views as of the date of this press release and these views could change. However, while the Company may elect to update these forward-looking statements at some point in the future, the Company specifically disclaims any obligation to do so. These forward-looking statements should not be relied upon as representing the Company's views as of any date subsequent to the date of this press release.
